

PESTREPELLER

Direct Plug-In

The PESTREPELLER utilizes the new electronics technology resulting from the research into the life cycle of household pests. Scientific research has found ultrasonic sound waves attack the auditory and nervous systems of most common pests causing them pain and discomfort. The high sound pressure will chase mice, cockroaches, fleas, ants and other common household pests away from their shelter.

PESTREPELLER will not interfere with home electronic appliances and is not harmful to humans and general household pets because the sound waves are out of the range of hearing.

INSTRUCTIONS:

- The unit takes two to six weeks for satisfactory elimination of household pests.
- Suitable for use in homes, restaurants, warehouses, stores and many other places.
- Plug into outlet (preferable in a central location of your home) and switch on. The red LED indicator will flash showing the unit is working properly.
- To ensure the most effective result, do not locate the unit at carpeted area or close to soft objects.
- Always plug the unit in even after results have been obtained. The cost for continual use is minimal.

SPECIFICATIONS:

Power Sources: AC 220-240V, 50 Hz (round pins)

Power Consumption: 1.5 Watts

Sound Frequency: 21K Hz - 25K Hz

Effective Area: 2,000 – 2,500 sq. ft. (180 – 230 M²) unobstructed
